You will be amazed at how affordable better protection is.

“With a lower initial cost and greatly reduced total cost of ownership the FA100 delivers better value than any other system on the market⁴.”

The Power to Protect.

- **All welding fumes** contain toxic chemicals and pollutants that can damage your respiratory system. The inhalation of iron, one of the commonest components in welding fumes, significantly increases the risk of lung cancer¹. **Welders have a 40% greater risk of lung cancer than other professional groups² largely due to the inhalation of toxic fumes.**
- A powered air purifying respirator system with a P3 filter and a helmet with an assigned protection factor of TH3 is recommended for welding³.
- A person or business undertaking welding has a duty of care to provide adequate protection against the hazards associated with welding⁵.

Focus Air delivers the protection welders need in a light-weight, compact package with all the features they demand.

Meeting or exceeding the requirements of the CE Standards and European Norms and independently certified to TH3/P3 Focus Air delivers new levels of protection and value for money.

FOCUS AIR POWERED AIR PURIFYING RESPIRATOR WITH P3 FILTRATION. RX1 WELDING HELMET WITH F300 AUTO DARKENING FILTER CERTIFIED TO TH3. HELMET IS HIGH IMPACT RATED TO AS/NZ 1337. 1/1/1/2 OPTICAL QUALITY ADF WITH 100 x 45 mm VIEWING AREA; SHADES 9-13, GRINDING MODE.
